TIXstream Express for Integrators

SPEEDING UP YOUR CLOUD WORKFLOWS

Increasing amounts of data, higher bandwidth, a growing number of customers and complex network environments result in challenging requirements for professional cloud services.

TIXstream Express (TXE) allows to integrate TIXEL's proven high-speed transfer technology into your Cloud services seamlessly: TXE provides easy setup and maintenance with light-weight interface. With TXE there is no need to rely on third party tools or external services for high-speed file exchange anymore.

Easy Integration	Non-disruptive	High Performance
Standard interfaces and light-weight software for easy integration and use	No need to re-invent your cloud service – just pure acceleration	TIXEL's proven high performance data transfer perfectly complements your system

## INTEGRATED HIGH-SPEED FILE TRANSFER

Benefits

- Provide faster feedback to your customers
- Shrink turn-around times – LAN speed in WAN environments, regardless of network latency
- Super light-weight standard REST interfaces
- Various ways of integration
- Highly customizable

Examples for Application

- Data-intensive Cloud Services
- File-based remote processing services
- Managed file exchange for B2B and B2C
- Interactive and batch file processing
- Distributed Media Production
- Content Distribution

HOW IT WORKS

Simple Integration

- Your cloud service application triggers transfer job creation by using the TXE server module
- Your client gets this transfer job for starting the TXE client handling the entire transfer
- TXE tracks the transfer keeping you up-to-date allowing your cloud service to query status information.
